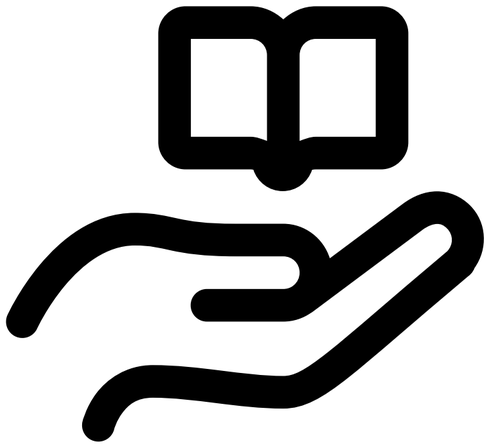
Crypton.AI

Smart Revision for Every Learner



Our Team

Pranjal Maghani

TECHPRENEUR FRONTEND DEV

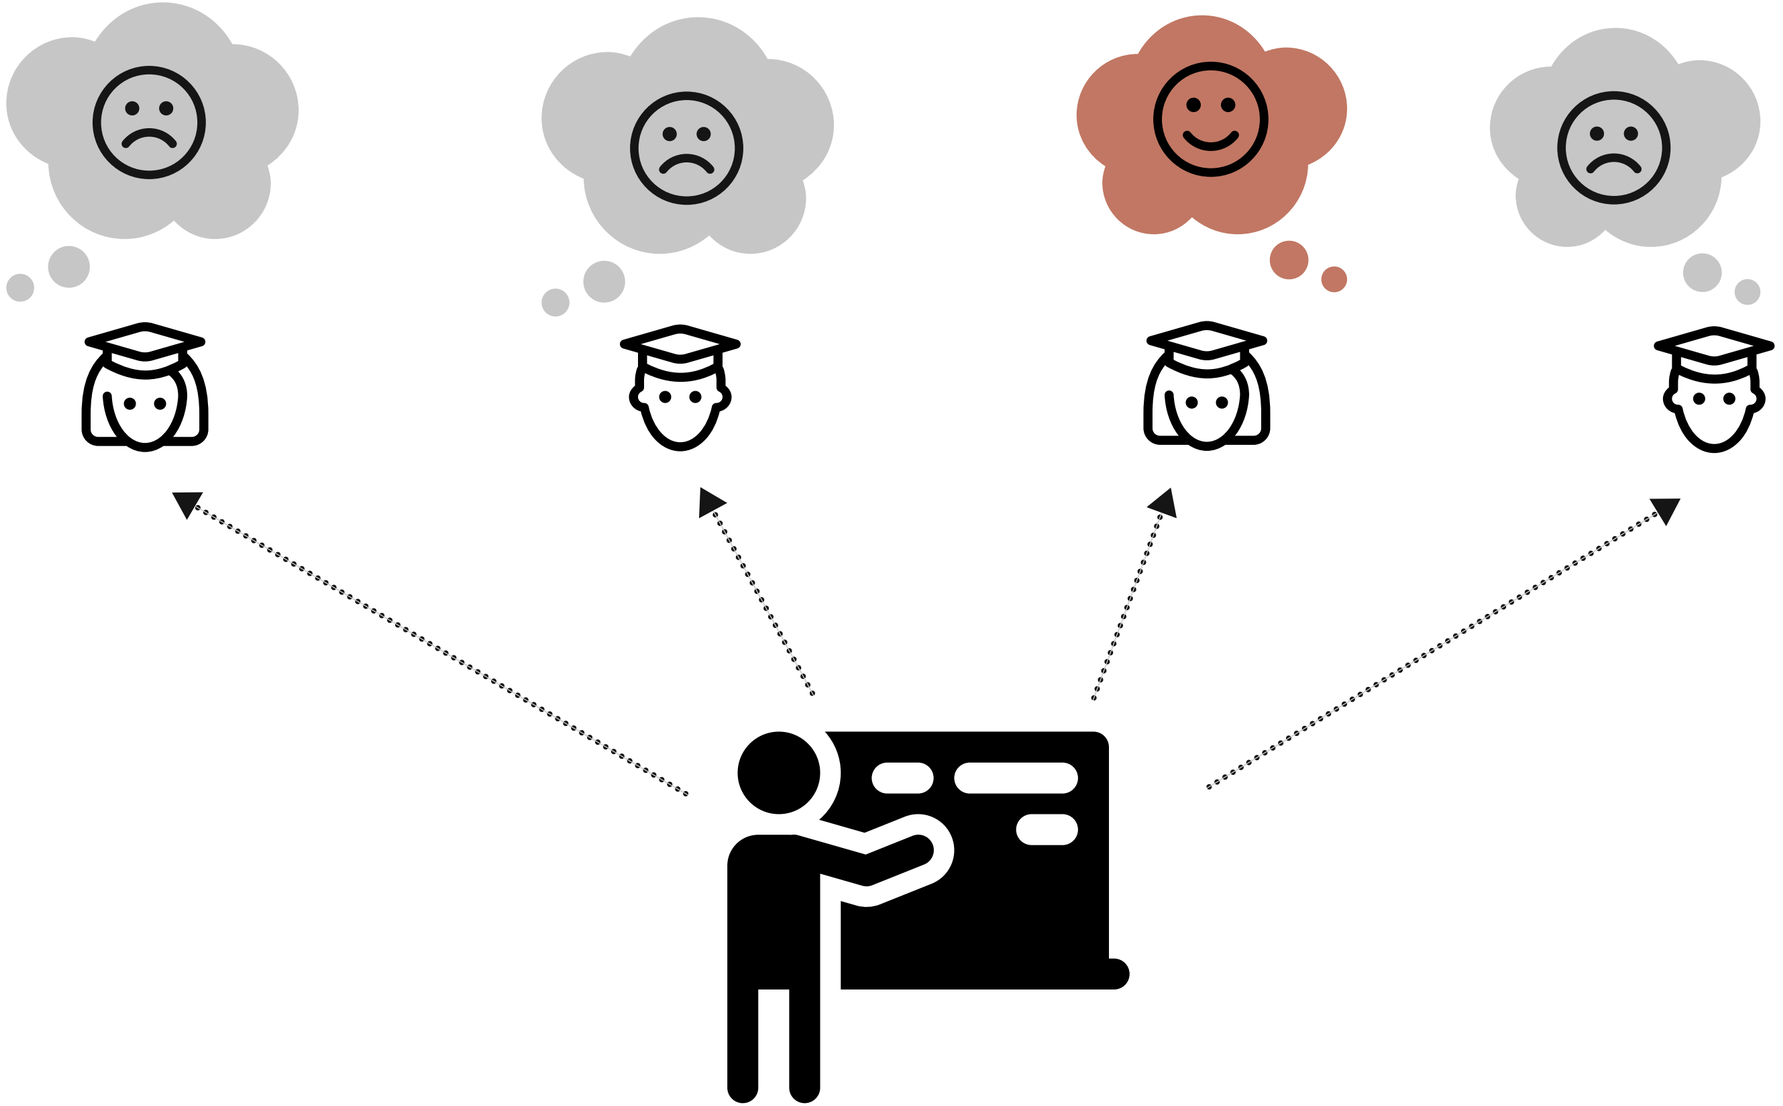
- Founded WSD STEM Club
- AUS Hackathon 2024 Participant
- Fluent in Python & Rust

Aditi Anand

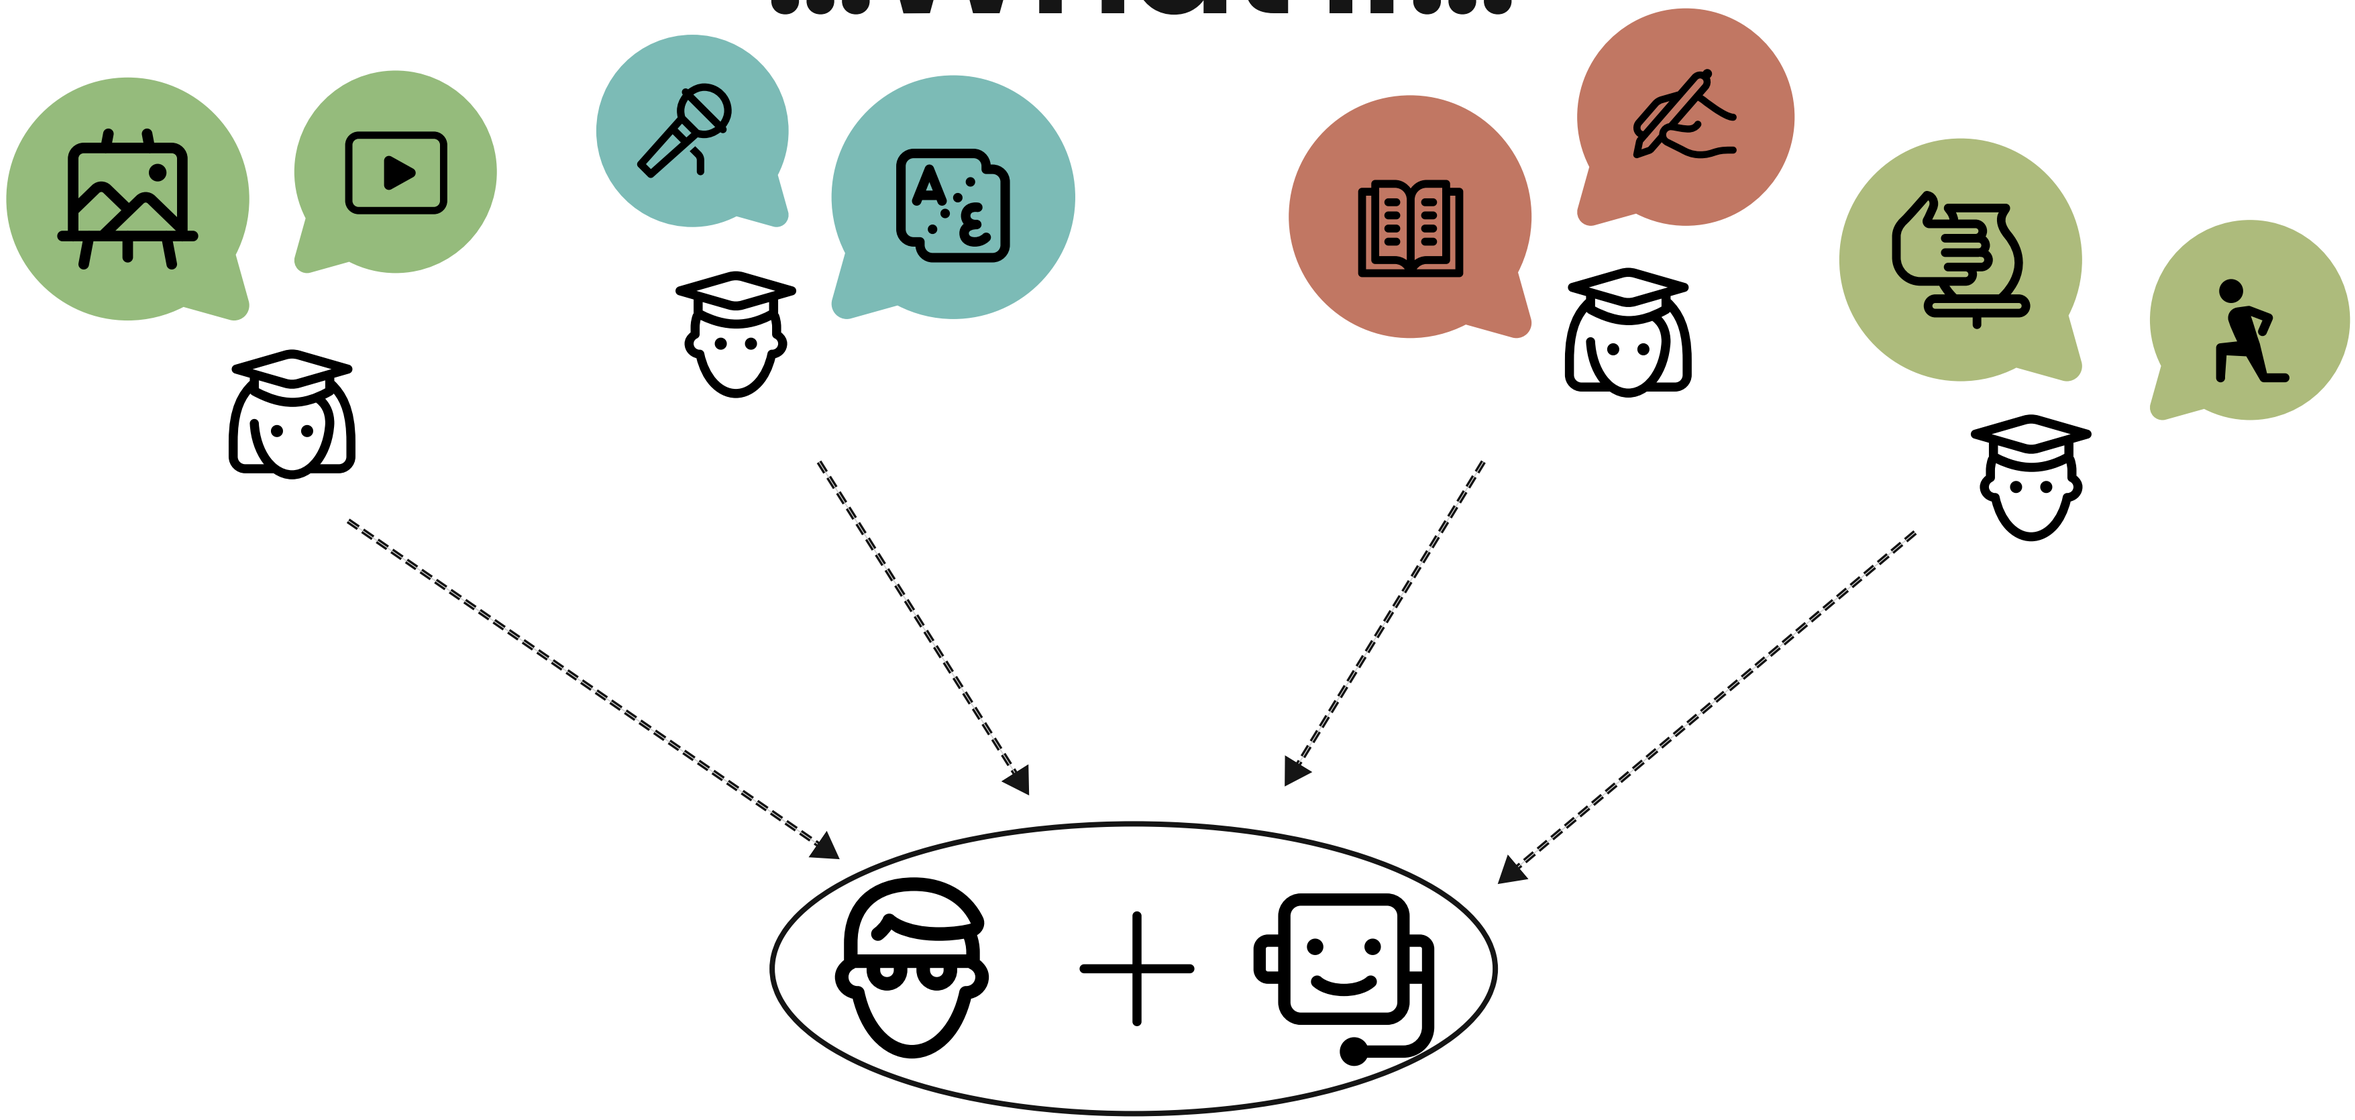
TECHPRENEUR, BACKEND DEV

- Founded SimplyBookworm.com
- Harvard CS50x Participant
- Fluent in Python, HTML, SQL

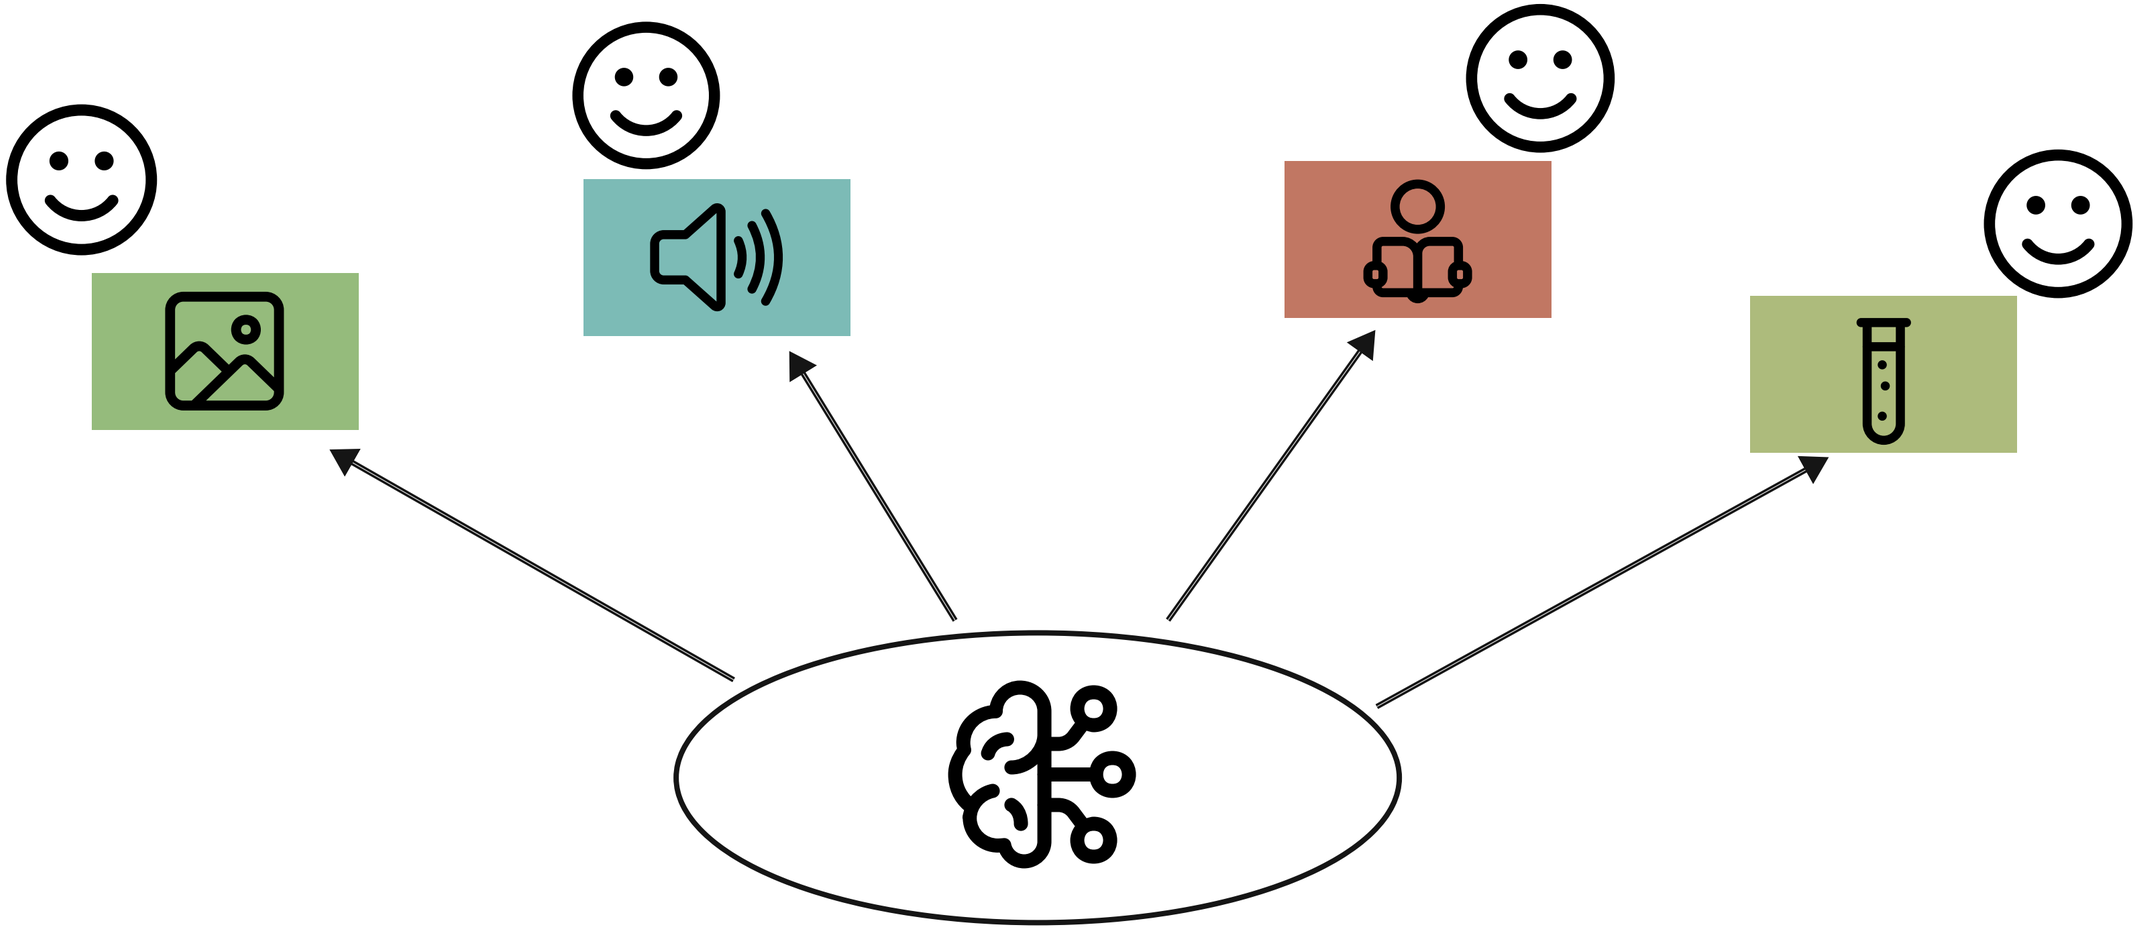
The Problem...



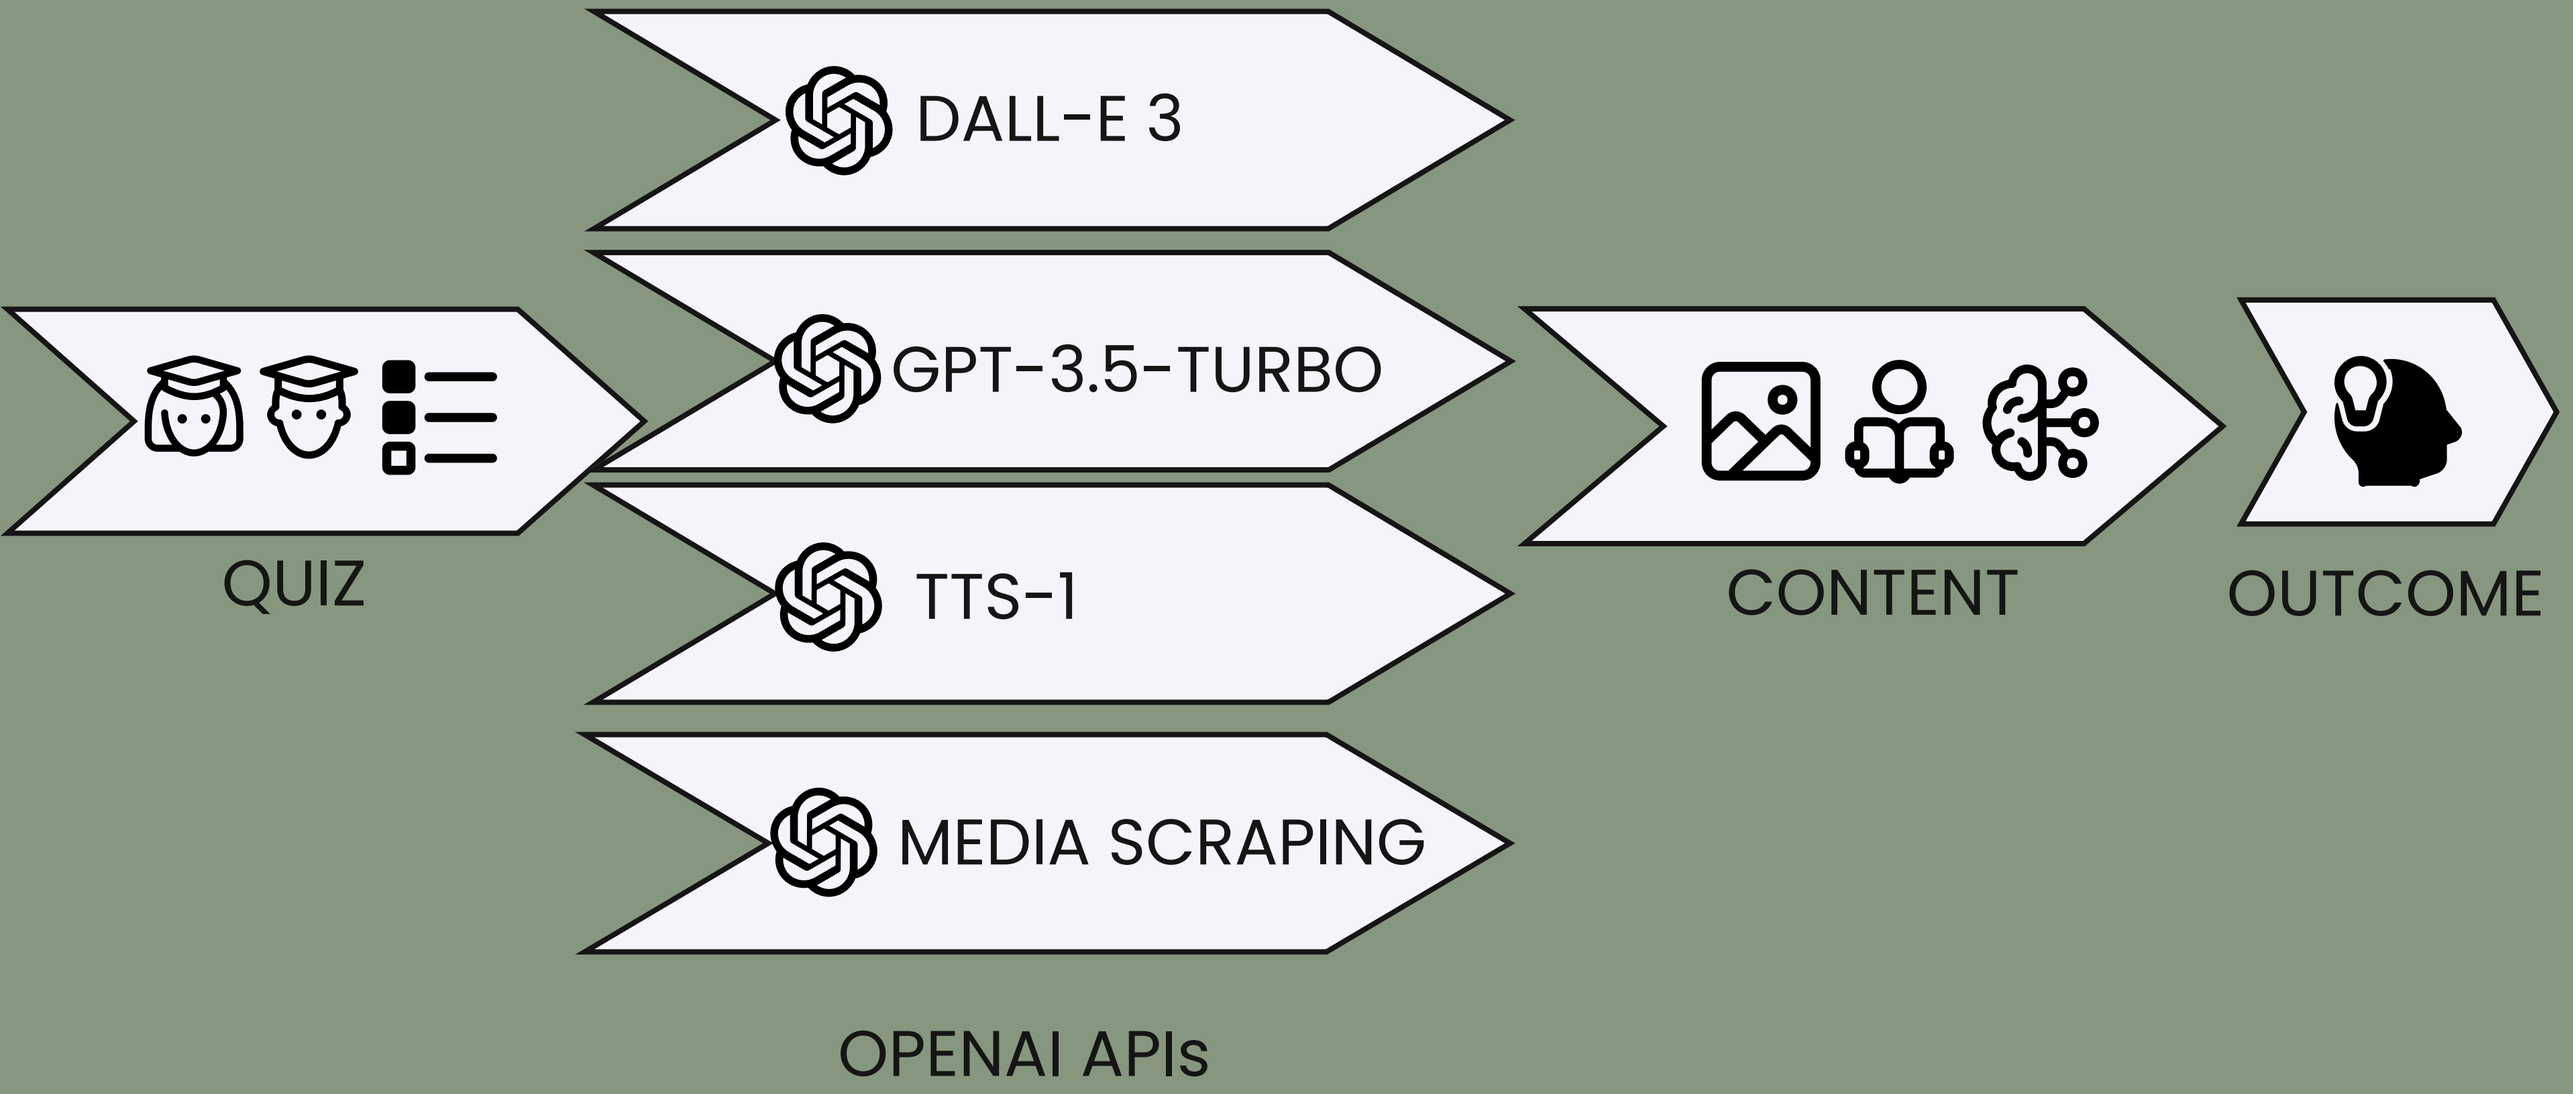
...What If...



...Re-Learn Student Learning

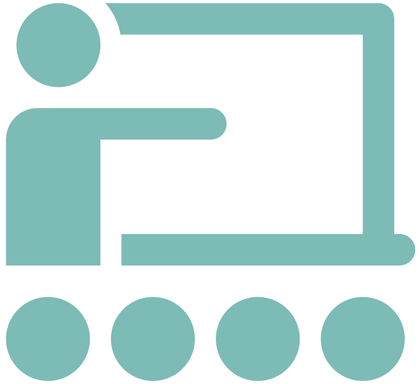


Our Approach

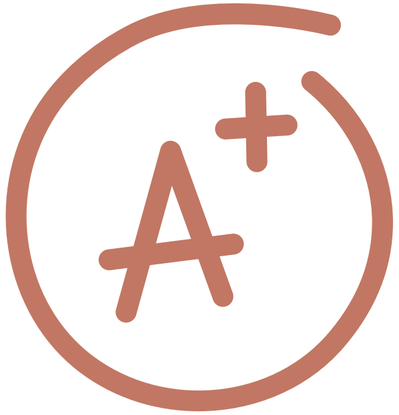


Our Market

EdTech is expected to have a CAGR of 18.1% year-over-year through 2027



32% of students believe they learn better when teaching methods match their learning style



Of students that use AI, 68% believe it has improved their grades

Our Impact

Strengthen learning engagement in classrooms, better quality of education provided at schools

Eliminate administrative burden on teachers to create personalized learning materials for each student

Provide flexible platform, up-to-date insights about student performance across academic year

The Future

Collaborate with KHDA, Education Ministry to adopt platform in place of traditional homework, assignments

Nurture diverse learning styles for inclusivity in high schools, universities, learning centers, and workspaces

Bridge existing gap in the market to cater to learning needs of people of determination

Thank You
